

Melanie Rodriguez
HUGO BOSS SS23

The beauty in Melanie's images is born of her profound sensitivity guiding her insatiable urge to create.

Her quest is to relate emotion and narrative through colour, form and texture, her photographs are visual expressions of universally-understood, ageless truths about love, joy and beauty, filtered through the history of photography, film and painting and through her own reaction to the wonder of existence.

Simultaneously deeply personal and of a common fundamental language which we can all understand.
